Re: INVITATION on behalf of the Latvian Ministry of Health, the Latvian Health Inspectorate and EPSO, the European Partnership of Supervisory Organisations in Health Services and Social Care

Dear EPSO friends and invited guests,

Please find enclosed the Programme of our 33<sup>rd</sup> EPSO Conference in Riga from 7-9 December 2022.

We are delighted to announce this extremely interesting Conference Programme that focuses on important new developments for regulators such as Digital Health and AI oversight, Preventive healthcare, Inter-agency collaboration and Effectiveness of healthcare regulation and inspection.

As you will notice we have a mix of highly qualified speakers and input from our partners worldwide (regulators and inspectorates).

Furthermore it is good to know that our conferences have a limited number of delegates and speakers with a maximum of 50 people on a long table. This EPSO-style-conferences aim to promote and support discussion and an open and interactive approach to our topics. According to our partners this is one of the great advantages of EPSO compared to other settings.

As we have at this conference topics that will interest not only inspectorates but also doctors and medical staff working from a quality improvement perspective in hospitals, and policy staff working with a quality improvement perspective at the Ministry of Health, we thought it a good idea to invite a limited number of delegates from outside our inspectorate setting.

Please do not miss the opportunity to join us - free of charge – as EPSO delegate, or as invited guest or expert in our 33<sup>rd</sup> EPSO Conference. You are more than welcome!

If you want to join, please contact me at [info@epsonet.eu](mailto:info@epsonet.eu) (+31613163557) or mr. Ludis Pauliņš at the Latvian Ministry of Health (+37129150458).

Joske Vos (Chair EPSO- board)
